Alagoria Gives BCH Holders Access to Major Retailers

Alagoria.com is a website that allows you to purchase products offered on Homedepot.com and Walmart.com. To do so, find an item you want to buy and then copy and paste the URL into Alagoria's search bar. The platform will check its latest price and availability as well as the sales tax and shipping cost, before it lets you add it to the shopping cart.

At checkout you'll be able to pay with your favorite cryptocurrency. Alagoria supports four major coins – bitcoin cash (BCH), bitcoin core (BTC), litecoin (LTC), and zcash (ZEC). Despite the irreversibility of crypto transactions, the company covers damages and costs resulting from purchases made with it for up to \$10,000.
